

Faber Vineyard

2024 Swan Valley

VERDELHO

Verdelho makes aromatic, full bodied white wines that are a delight to drink. The Swan Valley is one of very few wine regions worldwide that make great Verdelho.

The 2023-2024 season was incredibly hot and dry, culminating in an extraordinarily early harvest in early January. The early pick ensured the fruit was in excellent condition and ideal ripeness.

Hand picked from our own and neighbouring vineyards, the fruit was chilled over night, then crushed, with only the freshest free drained juice selected for this wine. Along with settling of the juice and cold fermentation, these winemaking choices preserve and highlight the fruit characters in the wine.

This an intense and powerful wine, with a zesty nose of sherbet, stonefruit, and dried lemon aromas. The palate is rich and full flavoured — with intense nectarine and honeydew melon characters. The palate is very long with a soft fruity finish

We believe that this is a very classical example of Swan Valley Verdelho from a hot vintage - displaying distinct varietal characters - and made in a ripe bold full bodied style so distinctive of our region.

Faber Vineyard was established in 1997 by well-known winemaker John Griffiths.

The dream is to grow regionally distinctive grapes and craft wines that are rich and flavoursome.
